

# About Us

## Our Story

Plainsview Physiotherapy, providing physiotherapy in Burlington, Ont., is dedicated to the vision that just starting to feel better after an injury or accident isn't enough. We want you to be better, and that means getting to the root cause of your pain and offering effective physiotherapy to treat it.

Founded in 2016, we are an orthopedic physiotherapist owned and operated clinic focused on offering one-on-one patient care.

Our patient-centred attitude is visible from your first meeting with us, when you will be assessed and a customized plan of science-based physiotherapy is recommended for you.

We know you want to get back to your normally active life and we are dedicated to helping you accomplish that as quickly as possible, without risking recurring injuries.

We offer such specialized services as acupuncture, massage therapy, chiropractic, orthotics, bracing and splinting, and custom knee bracing.

We also have a full program of orthopedic physiotherapy services include treating back pain and performing pre and post surgical therapy. We are experienced in treating patients impacted by motor vehicle accident injuries and workplace injuries.
